About

Passionate and detail-oriented aspiring front-end web developer with a keen eye for crafting visually captivating and user-centric websites. Eager to leverage my strong foundation in HTML, CSS, and JavaScript to make meaningful contributions to a dynamic team and gain valuable hands-on experience as an intern.

- **CSS**
- **SCSS**
- **Bootstrap**
- **Git**
- **Github**
- **PHP**
- **MySQL**
- **Figma**
- **Responsive Design Principles**

Projects

iSchedule Website & iSchedule Admin Website (Full- Stack Developer)

- Developed a web-based appointment system for Bulacan Medical Center.
- Deployed the system through Hostinger.
- iSchedule automates appointment processes, offering real-time calendar updates, including holidays and booked days. Patients can easily monitor and manage appointments through the user-friendly interface.
- iSchedule Admin efficiently oversees and controls the iSchedule Website. It enables statistical monitoring, appointment management across departments, facilitates schedule management, capable of exporting tables to Excel format, and encompasses a myriad of other functionalities.
- Developed with HTML, JavaScript, SCSS for front-end. PHP & MySQL for the back-end.

Nintendo Games Website (Full-Stack Developer)

- Crafted a dynamic website showcasing Nintendo games, capable of basic CRUD (Create, Read, Update, Delete) functionality.
- Developed with HTML, Javascript, & CSS. Used XML as data storage and PHP for the back-end.

Etch A Sketch Website (Front-End Developer)

- Designed and implemented a personal project focused on creating pixel-like art.
- Provide the ability to choose specific colors or generate them randomly.
- Supporting the creation of artwork across various canvas sizes.
- Developed with HTML, Javascript, and CSS.

Calculator Website (Front-End Developer)

- Designed and implemented a personal project that is capable of basic MDAS (Multiplication, Division, Addition, and Subtraction) functionality.
- Developed with HTML, Javascript, and CSS.

Tic Tac Fighter Website (Front-End Developer)

- Designed and implemented personal project that enables two players to engage in a tic-tac-toe game.
- Implemented an AI opponent with 2 (two) level of difficulty.
- Developed with HTML, Javascript, and SCSS.
