EXPERIENCE

IntelliSeven Solutions Incorporated (Intern, February 1, 2024 – April 25, 2024)
- Adhered closely to provided UI design guidelines when developing websites.
- Contributed to the company by developing various websites.
- Engaged in collaborative development efforts with team members

TECHNICAL SKILLS

- Vue.js
- Nuxt
- Tailwind CSS
- Git & Github
- React.js
- RESTful APIs
- Express.js
- MySQL
- PHP
- Figma
- Responsive Design Principles

PROJECTS

iSchedule Website & iSchedule Admin Website (JavaScript, CSS, PHP, MySQL)
- Solely developed and deployed a web-based appointment system for Bulacan Medical Center.
- iSchedule automates appointment processes, offering real-time calendar updates, including holidays and booked days. Patients can easily monitor and manage appointments through the user-friendly interface.
- iSchedule Admin efficiently oversees and controls the iSchedule Website. It enables statistical monitoring, appointment management across departments, facilitates schedule management, capable of exporting tables to Excel format, and encompasses a myriad of other functionalities.

Catalog-style e-commerce Client Website & Admin Website (Vue.js, Tailwind CSS, Express.js, MongoDB)
- Soley developed client website during my internship while adhering to provided UI designs & worked with other developers for the admin website.
- Client website is capable of displaying dynamic data from a RESTful API such as categories & products information.
- Implemented key features in admin website including product creation, display, update, and deletion.
- Developed numerous endpoints using Express for seamless integration and functionality.

Grandline Memory Game (Vue.js, Tailwind CSS)
- One Piece-themed memory card game where players match pairs of cards featuring characters from the series.
- Implemented engaging gameplay mechanics like animated card flipping, player health, timer, and a dynamic scoring system for increased player enjoyment.

Pokedex (Vue.js & Tailwind CSS)
- Utilized the PokéAPI to create a dynamic website showcasing comprehensive Pokémon data and information.

Resume Maker (React.js & Tailwind CSS)
- Incorporated sleek UI components to facilitate the creation of downloadable professional resumes, customized to meet individual requirements with ease.

AniManga Archive (React.js & Tailwind CSS)
- Leveraged the Jikan API to dynamically showcase anime and manga information on a website.
- Crafted a sleek dark mode interface to enhance user experience and visual appeal.

Tic Tac Fighter Website (Javascript, CSS)
- Designed and implemented a street fighter theme personal project that enables two players to engage in a tic-tac-toe game.
- Implemented an AI opponent with 2 (two) level of difficulty using minmax algorithm.

EDUCATION

Bulacan State University - Main

Malolos, Bulacan

Bachelor of Science in Information & Technology

2020 – Present
